---

## SUMMARY

Full-stack MERN developer focused on building scalable, user-centric web applications using React, Node.js, Express, and MongoDB. Strong frontend foundation with an eye for clean UI and responsive design. Experienced in designing RESTful APIs and building production-ready applications through personal projects. Open to **remote full-time roles** and **freelance contracts**.

---

## TECHNICAL SKILLS

**Frontend:** React, TypeScript, Tailwind CSS, HTML5, CSS3

**Backend:** Node.js, Express.js

**Database:** MongoDB

**Tools & Practices:** Git, GitHub, REST APIs, CRUD Operations, MVC Architecture

---

## PROJECTS

### Laptop E-Commerce Web Application

*React, Node.js, Express.js, MongoDB, Tailwind CSS*

- Developed a full-stack e-commerce platform with **product management, cart functionality, and user authentication**
  - Designed and implemented **RESTful APIs** for products, users, and orders with structured request/response handling
  - Integrated MongoDB for scalable data persistence and efficient querying
  - Built reusable React components and responsive layouts optimized for multiple screen sizes
  - Applied clean backend architecture to support future feature scalability
-

## Blog Platform

*React, TypeScript, Node.js, Express.js, MongoDB*

- Built a secure blogging platform supporting **user authentication and full CRUD functionality**
  - Enabled users to create, edit, and delete blog posts with protected access controls
  - Structured backend logic using **MVC architecture** for maintainability and scalability
  - Leveraged **TypeScript** to improve code safety, reduce runtime errors, and enhance long-term reliability
  - Connected frontend and backend via well-defined REST APIs
- 

## Tailoring Business Landing Page

*React, TypeScript, CSS*

- Designed and developed a modern, responsive landing page for a fashion business
  - Implemented reusable components and consistent layout patterns
  - Focused on clean UI, accessibility, and mobile-first responsiveness
  - Demonstrated strong frontend fundamentals and attention to visual detail
- 

## EXPERIENCE

### Personal & Freelance-Style Projects

#### Full-Stack MERN Developer

- Built and deployed multiple full-stack web applications using **React, Node.js, Express, and MongoDB**
- Designed scalable backend architectures using **MVC principles** and clean separation of concerns
- Developed **RESTful APIs** to support CRUD operations, authentication flows, and client-side data consumption

- Implemented user authentication and protected routes for secure access to application features
- Translated UI designs into **responsive, accessible React interfaces** using reusable components
- Managed application state and handled asynchronous API interactions on the frontend
- Used **Git and GitHub** for version control, iterative development, and project management
- Deployed applications to production environments and maintained environment-based configurations

---

## EDUCATION

BSc Software Engineering, Bayero University Kano (2023-Present)

---

## AVAILABILITY

Open to **remote full-time opportunities** and **freelance projects**
